

Big Wide World

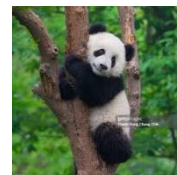

Autumn 1

Beachcombers, Sailors, Cavers and Divers

This project teaches children about the global community to which they belong and explores how living things, communities and climates differ around the world.

Activities you may like to do at home;

1. Look at photographs of holidays or trips you have taken. Talk about how you travelled to your destination and activities you did
2. Look at the world map. Can you find the United Kingdom?
3. These animals live in different places around the world. Can you name them? Where do they live?

4. What is your favourite animal? Where in the world does it live? Can you draw a picture of it?
5. Watch episodes of *Where in the World?* on CBeebies. What did you find out?
6. Can you find some flags from around the world? What colours are they? Which country do they belong to?
